EDUCATION

Trinity College Dublin

B.A. (Moderatorship) in Computer Science

Dublin, Ireland

Expected May 2029

- **Relevant coursework:** Linear Algebra, Number Theory, Discrete Mathematics, Statistical Analysis, Programming Projects, Sustainable Development For Computer Science, Digital Logic, OOP Paradigm, Design Patterns

EXPERIENCE

Bremore Educate Together

Teaching Assistance (2 Weeks)

March 2023 - March 2023

Balbriggan, Co. Dublin, Ireland

- Assisted secondary school teacher in subjects such as maths, science, music and PE.
- Shadowing teacher and learn about their teaching techniques.
- Understanding the people, time and equipment management inside of a school setting.

Matrix Internet

Frontend Developer (2 weeks)

December 2022 - December 2022

Remote

- Built a Dashboard website for courier company with clean minimal design.
- Using JavaScript to parse the data and rendered it out as tables and graphs.

PROJECTS

Flight Analyser | Java, Swing Library

- Desktop application built in Java (Swing) that lets users search, filter, and visualise historical and live flight data sourced from the OpenSky API and offline CSV datasets
- Features include full-text search, sort by parameters, live map view and animated graphs

Encryption Ciphers | C language

- Encrypt a txt file with affine cipher.
- Project is still under active development, planning to extend the suite with exponential ciphers and RSA cipher alongside with their deciphers.

Dashboard | HTML, CSS, JavaScript

- An analytics dashboard for a courier software platform, displaying real-time job and revenue.
- Added company and year filter controls that re-render charts and summary stats on selection, with date-based table filtering

SKILLS

- **Languages:** English, Chinese
- **Programming Languages:** Java, C, JavaScript, Python
- **Frameworks & Libraries:** Java Swing, React
- **Development Tools:** git, docker, maven, node, npm, vite
