Education

Trinity College Dublin
Dublin, Ireland
B.A. (Moderatorship) in Computer Science
Expected May 2029

- **Relevant coursework**: Linear Algebra, Number Theory, Discrete Mathematics, Statistical Analysis, System Programming, Computer Architecture, Digital Logic, OOP Paradigm, Design Patterns

Experience

Formula Trinity
October 2026 - Present
Simulation Department
Trinity College Dublin

- New member of the Trinity Formula Student automonous team.
- Currently learning: ros2

S2S Mentor
September 2026 - Present
Student Mentor
Trinity College Dublin

- Mentored first-year students through their transition to university, providing guidance on academic expectations, study habits and student life.
- Organised social events to help new students build networks and feel part of the college community.

Projects

Flight Analyser | Java, Swing Library
- Desktop application built in Java (Swing) that lets users search, filter, and visualise historical and live flight data sourced from the OpenSky API and offline CSV datasets
- Features include full-text search, sort by parameters, live map view and animated graphs

Encryption Ciphers | C language
- Encrypt a txt file with affine cipher.
- Project is still under active development, planning to extend the suite with exponential ciphers and RSA cipher alongside with their deciphers.

Dashboard | HTML, CSS, JavaScript
- An analytics dashboard for a courier software platform, displaying real-time job and revenue.
- Added company and year filter controls that re-render charts and summary stats on selection, with date-based table filtering

Skills

- **Languages:** English, Chinese
- **Programming Languages:** Java, C, JavaScript, Typescript, Python
- **Frameworks & Libraries:** Java Swing, React, Astro, Next.js
- **Development Tools:** Git, Gitea Actions, Docker, Maven, Node, NPM, Vite
